

VANCOUVER
STROKE PROGRAM
CLINICAL - RESEARCH FELLOWSHIP

- A flexible and intellectually challenging opportunity suitable for clinical and academic career trajectories
- A high-volume academic centre in one of the most beautiful cities in the world
- Five fully-funded positions for 1-2 years with health benefits and conference allowances

CLINICAL PROGRAM We have a busy clinical program based at Vancouver General Hospital with separate stroke ward/acute stroke and consult services, and stroke prevention clinic. We assess over 1500 emergency and inpatients and over 2000 outpatients annually and provide telephone advice coverage for the entire province and the Yukon. We have 24/7/365 endovascular coverage and have excellent and close working relationships with our neuroradiology and neurosurgery colleagues. Our group has seven fellowship-trained stroke neurologists and one general neurologist with an interest in stroke.

EDUCATIONAL AND RESEARCH PROGRAM Our educational program includes weekly didactic lectures, clinical rounds, stroke fellow seminar and journal club. All of our fellows are involved in clinical research. Our research expertise includes clinical trials, cerebral small vessel disease, post-stroke cognition and patient-centered post-stroke issues, cerebral venous thrombosis, and data-driven decision-making in acute care. We are an active participating site for several national and international stroke clinical trials and have three full-time research co-ordinators and three undergraduate research assistants.

ELIGIBILITY Neurologists, internists, and emergency physicians who are FRCPC-certified prior to the fellowship start date may apply. Fellowships are for a minimum of one year. **All applicants must meet the BC College of Physicians English proficiency requirements.** (<https://www.cpsbc.ca/files/pdf/REG-ELP.pdf>).

Prospective candidates may contact Dr. Thalia Field for more information.
